CONTENTS OF VOLUME 27

Issue 1

1 Publisher's Note

3 Transient analytic elements for periodic Dupuit–Forchheimer flow
M. BAKKER

13 Immiscible displacement in a channel: simulations of fingering in two dimensions
Q. KANG, D. ZHANG & S. CHEN

23 Uncertainty for solute movement in bounded heterogeneous porous media
C.-M. CHANG

31 MODFLOW equipped with a new method for the accurate simulation of axisymmetric flow
N. SAMANI, M. KOMPANI-ZARE & D.A. BARRY

47 The accuracy of stochastic perturbation solutions to subsurface transport problems
S.-G. LI, D. MCLAUGHLIN & H. LIAO

57 Reduced models for linear groundwater flow models using empirical orthogonal functions
P.T.M. VERMEULEN, A.W. HEEMINK & C.B.M. TE STROET

71 Modelling guidelines—terminology and guiding principles
J.C. REFSGAARD & H.J. HENRIKSEN

83 The impact of interannual rainfall variability on the spatial and temporal patterns of vegetation in a water-limited ecosystem
C.P. FERNANDEZ-ILLESCAS & I. RODRIGUEZ-ITURBE

97 Conference Diary

Issue 2

99 Control volume function approximation methods and their applications to modeling porous media flow II: the black oil model
B. LI, Z. CHEN & G. HUAN

121 Snowmelt induced stemflow in northern hardwood forests: a theoretical explanation on the causation of a neglected hydrological process
D.F. LEVIA JR. & S.J. UNDERWOOD

129 Application of the discontinuous spectral Galerkin method to groundwater flow
S. FAGHERAZZI, D.J. FURBISH, P. RASETARINERA & M.Y. HUSSAINI

141 Nonlinear kinematic dispersion in channel network response and scale effects: application of the meta-channel concept
J. SNELL, M. SIVAPALAN & B. BATES

155 Time behavior of solute transport in heterogeneous media: transition from anomalous to normal transport
M. DENTZ, A. CORTIS, H. SCHER & B. BERKOWITZ

175 Continuum percolation theory for water retention and hydraulic conductivity of fractal soils: estimation of the critical volume fraction for percolation
A.G. HUNT

185 Estimation and forecasting of daily suspended sediment data by multi-layer perceptrons
H.K. CIGIZOGLU

Short communication

197 An explicit derivation of an exponential dependence of the hydraulic conductivity on relative saturation
A.G. HUNT

Discussion

203 Comment on ''Coupled reactive mass transport and fluid flow: issues in model verification'' by Freedman and Ibaraki
P.C. LICHTNER

205 Conference Diary

Issue 3

207 A numerical Eulerian method of moment for solute transport in a nonstationary dual-porosity medium
J. XU & B.X. HU

223 An inverse dual reciprocity method for hydraulic conductivity identification in steady groundwater flow
A. FARCAS, L. ELLIOTT, D.B. INGHAM & D. LESNIC

237 Water exclusion from tunnel cavities in the saturated capillary fringe
E.G. YOUNGS, A.R. KACIMOV & YU.V. OBNOSOV

245 Continuum percolation theory for pressure–saturation characteristics of fractal soils: extension to non-equilibrium
A.G. HUNT

259 Central scheme for two-dimensional dam-break flow simulation
G. GOTTARDI & M. VENUTELLI

269 Moments of truncated continuous univariate distributions
J.W. JAWITZ

283 Modeling of unsaturated water flow in double-porosity soils by the homogenization approach
J. LEWANDOWSKA, A. SZYMKIEWICZ, K. BURZYŃSKI & M. VAUCLIN

297 Response of the salt–freshwater interface in a coastal aquifer to a wave-induced groundwater pulse: field observations and modelling
N. CARTWRIGHT, L. LI & P. NIELSEN

305 Conference Diary

Issue 4

307 Preface

311 Single collocation point methods for the advection–diffusion equation
I. HERRERA, M. DÍAZ-VIERA & R. YATES

323 A split operator approach to reactive transport with the forward particle tracking Eulerian Lagrangian localized adjoint method
L.S.J. BELL & P.J. BINNING

335 Simulating biodegradation of toluene in sand column experiments at the macroscopic and pore-level scale for aerobic and denitrifying conditions
H.-S. KIM, P.R. JAFFÉ & L.Y. YOUNG

349 Nonlinear response of streamflow to groundwater pumping for a hydrologic streamflow model
D.P. AHLFELD

361 A fully coupled physically-based spatially-distributed model for evaluating surface/subsurface flow
S. PANDAY & P.S. HUYAKORN

383 Deformations and the Karoo aquifers of South Africa
J.F. BOTHA & A.H.J. CLOOT

399 Type curves and effective parameters for unsaturated flow systems with structured heterogeneities
M.S.U. ZAMAN, L.A. FERRAND & M.A. CELIA

411 Influence of textural and wettability variations on predictions of DNAPL persistence and plume development in saturated porous media
T.J. PHELAN, L.D. LEMKE, S.A. BRADFORD, D.M. O'CARROLL & L.M. ABRIOLA

429 Influence of mass transfer resistance on detection of nonaqueous phase liquids with partitioning tracer tests
P.T. IMHOFF & K. PIRESTANI

445 A numerical Lagrangian stochastic approach to upscaling of dispersivity in solute transport
D.W. DEAN & T.F. RUSSELL

465 Conference Diary

Issue 5

467 Effect of vertical resolution on predictions of transpiration in water-limited ecosystems
A.J. GUSWA, M.A. CELIA & I. RODRIGUEZ-ITURBE

481 Simple scaling properties of Canadian annual average streamflow
S. YUE & T. YEW GAN

497 Modeling groundwater flow to elliptical lakes and through multi-aquifer elliptical inhomogeneities
M. BAKKER

507 Generalized solution to multi-dimensional multi-species transport equations coupled with a first-order reaction network involving distinct retardation factors
C.R. QUEZADA, T. PRABHAKAR CLEMENT & K.-K. LEE

521 Layer averaged Richard's equation with lateral flow
P. KUMAR

533 Numerical modelling of alluvial rivers subject to interactive sediment mining and feeding
Z. CAO & G. PENDER

547 Testing density-dependent groundwater models: two-dimensional steady state unstable convection in infinite, finite and inclined porous layers
D. WEATHERILL, C.T. SIMMONS, C.I. VOSS & N.I. ROBINSON

563 Conference Diary

Issue 6

565 Computation of variably saturated subsurface flow by adaptive mixed hybrid finite element methods
M. BAUSE & P. KNABNER

583 Estimating flow parameter distributions using ground-penetrating radar and hydrological measurements during transient flow in the vadose zone
M.B. KOWALSKY, S. FINSTERLE & Y. RUBIN

601 Possible factors controlling the effectiveness of bioenhanced dissolution of non-aqueous phase tetrachloroethene
M. CHU, P.K. KITANIDIS & P.L. MCCARTY

617 Improved treatment of source terms in TVD scheme for shallow water equations
M.-H. TSENG

631 Evidence for global runoff increase related to climate warming
D. LABAT, Y. GODDÉRIS, J.L. PROBST & J.L. GUYOT

643 Evapotranspiration in semi-arid wetlands: relationships between inundation and the macrophyte-cover:open-water ratio
S. SÁNCHEZ-CARRILLO, D.G. ANGELER, R. SÁNCHEZ-ANDRÉS, M. ALVAREZ-COBELAS & J. GARATUZA-PAYÁN

657 Analytical solutions of one-dimensional macrodispersion in stratified porous media by the quadrupole method: convergence to an equivalent homogeneous porous medium
S. DIDIERJEAN, D. MAILLET & C. MOYNE

669 On the non-linear behavior of a laminar single-phase flow through two and three-dimensional porous media
M. FOURAR, G. RADILLA, R. LENORMAND & C. MOYNE

679 Conference Diary

Issue 7

681 Residence time, groundwater age, and solute output in steady-state groundwater systems
H.A. LOÁICIGA

689 Forward and backward location probabilities for sorbing solutes in groundwater
R.M. NEUPAUER & J.L. WILSON

707 Porosity–permeability properties generated with a new 2-parameter 3D hydraulic pore-network model for consolidated and unconsolidated porous media
R.C. ACHARYA, S.E.A.T.M. VAN DER ZEE & A. LEIJNSE

725 Validity of a moving boundary finite element model for salt intrusion in a branching estuary
D.B. DAS & V. NASSEHI

737 A modified Levenberg–Marquardt algorithm for quasi-linear geostatistical inversing
W. NOWAK & O.A. CIRPKA

751 Stochastic discrete model of karstic networks
O. JAQUET, P. SIEGEL, G. KLUBERTANZ & H. BENABDERRHAMANE

761 Enhancing tidal prediction accuracy in a deterministic model using chaos theory
S.A. SANNASIRAJ, H. ZHANG, V. BABOVIC & E.S. CHAN

773 Conference Diary

Issue 8

775 Analytical solutions to steady state unsaturated flow in layered, randomly heterogeneous soils via Kirchhoff transformation
Z. LU & D. ZHANG

785 Requirements of a global near-surface soil moisture satellite mission: accuracy, repeat time, and spatial resolution
J.P. WALKER & P.R. HOUSER

803 Effects of hydrodynamic dispersion on plume lengths for instantaneous bimolecular reactions
P.A.S. HAM, R.J. SCHOTTING, H. PROMMER & G.B. DAVIS

815 Methods for generating non-separable spatiotemporal covariance models with potential environmental applications
A. KOLOVOS, G. CHRISTAKOS, D.T. HRISTOPULOS & M.L. SERRE

831 EOF analysis of surface soil moisture field variability
C. YOO & S. KIM

843 Relating flow channelling to tracer dispersion in heterogeneous networks
C. BRUDERER-WENG, P. COWIE, Y. BERNABÉ & I. MAIN

857 Erratum

Issue 9

859 Conditional simulations of flow in randomly heterogeneous porous media using a KL-based moment-equation approach
Z. LU & D. ZHANG

875 A physically based approach for modeling multiphase fracture–matrix interaction in fractured porous media
Y.-S. WU, L. PAN & K. PRUESS

889 Treatment of precipitation uncertainty in rainfall-runoff modelling: a fuzzy set approach
S. MASKEY, V. GUINOT & R.K. PRICE

899 Three-dimensional local grid refinement for block-centered finite-difference groundwater models using iteratively coupled shared nodes: a new method of interpolation and analysis of errors
S. MEHL & M.C. HILL

913 Streamline-based simulation of advective–dispersive solute transport
E.-O. OBI & M.J. BLUNT

925 Numerical investigation of saturated source area behavior at the small catchment scale
J.M. NIEDZIALEK & F.L. OGDEN

937 Analysis of bedload transport in laminar flows
N.-S. CHENG

943 Stochastic dynamics of BOD in a stream with random inputs
R. REVELLI & L. RIDOLFI

Issue 10

953 Regional flow-duration curves: reliability for ungauged basins
A. CASTELLARIN, G. GALEATI, L. BRANDIMARTE, A. MONTANARI & A. BRATH

967 A method for filtering out raingauge representativeness errors from the verification distributions of radar and raingauge rainfall
E. HABIB, G.J. CIACH & W.F. KRAJEWSKI

981 Modified Theis equation by considering the bending effect of the confining unit
X.S. WANG, C.X. CHEN & J.J. JIAO

991 Experimental observations of watertable waves in an unconfined aquifer with a sloping boundary
N. CARTWRIGHT, P. NIELSEN & L. LI

1005 A comparison of mathematical model formulations for organic vapor transport in porous media
C.-S. FEN & L.M. ABRIOLA

1017 Effective conductivity of periodic media with cuboid inclusions
T. HARTER & C. KNUDBY

1033 Dimensional analysis and upscaling of two-phase flow in porous media with piecewise constant heterogeneities
R. HILFER & R. HELMIG

1041 Comment on ''Layer averaged Richards' equation with lateral flow'' by Praveen Kumar
C.A. TALBOT, F.L. OGDEN & D. OR

1043 Reply to comment by Talbot et al. on ''Layer averaged Richards' equation with lateral flow''
P. KUMAR

Issue 11

1045 Semi-analytical solutions for solute transport in fractured porous media using a strip source of finite width
M.R. WEST, B.H. KUEPER & K.S. NOVAKOWSKI

1061 Longitudinal interpolation of parameters characterizing channel geometry by piece-wise polynomial and universal kriging methods: effect on flow modeling
B.F. SANDERS & C.V. CHRYSIKOPOULOS

1075 Analytic solutions for groundwater whirls in box-shaped, layered anisotropic aquifers
M. BAKKER & K. HEMKER

1087 Stochastic modeling of complex nonstationary groundwater systems
S.-G. LI, H.-S. LIAO & C.-F. NI

1105 A stochastic dynamic programming model with fuzzy storage states for reservoir operations
S.J. MOUSAVI, K. MAHDIZADEH & A. AFSHAR

1111 An investigation of overlapping domain decomposition methods for one-dimensional dispersive long wave equations
S. GLIMSDAL, G.K. PEDERSEN & H.P. LANGTANGEN

Issue 12

1135 Carbon and water cycling in a Bornean tropical rainforest under current and future climate scenarios
T. KUMAGAI, G.G. KATUL, A. PORPORATO, T.M. SAITOH, M. OHASHI, T. ICHIE & M. SUZUKI

1151 Stochastic analysis of immiscible displacement of the fluids with arbitrary viscosities and its dependence on support scale of hydrological data
A.M. TARTAKOVSKY, P. MEAKIN & H. HUANG

1167 Three-dimensional numerical modelling of wind-driven circulation in a homogeneous lake
M.B. KOÇYIGIT & R.A. FALCONER

1179 Modelling estuarine and coastal flows using an unstructured triangular finite volume algorithm
M. NAMIN, B. LIN & R.A. FALCONER

1199 Mass-conservative finite volume methods on 2-D unstructured grids for the Richards' equation
G. MANZINI & S. FERRARIS

1217 Experimental and theoretical investigations of drainage in horizontal rough-walled fractures with different correlation structures
I. NEUWEILER, I. SORENSEN & W. KINZELBACH

I Contents of Volume 27
